EXPERIENCE SUMMARY

- Graduate of The Tech Academy's AI Software Development Bootcamp with hands-on experience in Python, JavaScript, AI/NLP, machine learning, APIs, software testing, and web development.
- Built and refined a Python Study Assistant with Rule-Based and NLP chat engines, 216 labeled training examples across nine intents, and 32 passing automated tests.
- Designed Tkinter desktop and responsive browser interfaces with HTML, CSS, and JavaScript while reusing the same Python chatbot engines.
- Integrated Google's Gemini API in a Python CLI with secure environment-variable credentials, input validation, and error handling.
- Worked in Agile/Scrum using Azure DevOps, Git branches, user stories, pull requests, automated testing, and iterative refinement.

SKILLS SUMMARY

Programming/Development:	Python, JavaScript, HTML, CSS, SQL, C#, R
Frameworks/Libraries:	React, Flask, .NET, NLTK, scikit-learn, pandas, NumPy
Database:	SQL
IDEs:	VS Code
Project Management:	Agile/Scrum, Azure DevOps, user stories, sprint workflows
Version Control:	Git, GitHub, branching, pull requests
Business Domains:	Automotive, construction/trades, small business operations
Non-Technical:	Critical reasoning, documentation, quality review, troubleshooting

EXPERIENCE

- **Software Developer** — The Tech Academy Live Project - Remote Aug 2026
- Developed and refined a **Python Study Assistant** with Rule-Based and NLP chat engines, including conversation state, input normalization, contextual responses, and safe fallback behavior.
- Expanded NLP training to 216 labeled examples across nine intents; added stop-word filtering, confidence-aware fallback logic, and reproducible training/evaluation.
- Built a Tkinter desktop GUI and responsive HTML/CSS/JavaScript web interface with runtime switching between chat engines.
- Expanded regression coverage to 32 passing automated tests and checked desktop, browser, mobile-width, long-input, unsupported-input, and state behavior.
- Worked in an Agile/Scrum team using Azure DevOps, Git branching, user stories, stand-ups, pull requests, and iterative code refinement.

-
- **Independent Software Projects (2026) — Gemini API Assistant** — Built a Python CLI using Google's Gemini API with secure environment-variable credentials, input validation, and error handling.
 - **Data Preprocessing & Feature Engineering** — Used Python and pandas to clean CSV data, handle missing values and duplicates, engineer features, and export processed datasets.
 - **Machine Learning & NLP** — Built projects with scikit-learn and TensorFlow/Keras, including logistic regression, sentiment analysis, neural-network image classification, and model evaluation.
 - **Developer Portfolio** — Designed and deployed a responsive HTML/CSS/JavaScript site on GitHub Pages with interactive navigation, project links, a slideshow, and Formspree contact functionality.
 - **Docker & Python** — Containerized Python code and completed exercises with YAML data, time-series forecasting using Prophet, and machine-learning datasets.

Head Painter | Apollo Painting - Bend, OR | May 2025 - Oct 2025

Experienced Painter | Bill Sizemore Painting - Redmond, OR | Nov 2023 - Nov 2024

Service Writer | Auto Network Group - Bend, OR | Jan 2023 - Jun 2023

Managed technical service documentation, estimates, scheduling, and workflow coordination; implemented a connected CRM process that improved information flow.

Managing Painting Contractor | South Sister Construction - Sisters, OR | Mar 2020 - Jan 2023

Directed schedules, estimates, budgets, materials, quality control, and project completion while introducing technology-based project tracking.

EDUCATION & TRAINING

AI Software Development Bootcamp | The Tech Academy - December 2025 - August 2026

- Hands-on training in Python, JavaScript, HTML/CSS, SQL, C#/.NET, web development, APIs, machine learning, neural networks, NLP, data processing, Docker, software testing, Git/version control, and collaborative Agile development.

High School Diploma | Sisters High School - 2009
